Annals of NUCLEAR ENERGY

U. I. C. C.
JAN 8 1976
LIBRARY

List of contents and Authors, Volume 2, 1975

Dear Reader:

I am pleased to bring to your notice the aims and scope, table of contents and author index of recent issues of this journal together with an invitation to consider submitting, for editorial consideration, suitable manuscripts for the journal. I hope very much that you will be good enough to examine this material and, where necessary (perhaps in consultation with your colleagues) that you will decide to recommend the purchase of a subscription to the journal by your main or departmental library.

If the library in your organization is either a subscriber already or becomes a subscriber then you or your colleagues who may be interested can obtain a personal subscription at a reduced rate.

On the back pages you will also find information about some important reference works, text books and other journals published by Pergamon Press, some of which we hope you will find of interest.

I should welcome suggestions for the publication of new text and reference books, proceedings of timely and important conferences or the commissioning of review articles that may be needed by yourself or colleagues working in your own speciality.

Thank you in advance for your kind consideration for these matters.

Robert Maxwell

NUMBER 1

Editorial 1

A. Tobias: Shutdown heating 3

K. Kobayashi: Solution of group diffusion equation for X-Y geometry by finite Fourier transformation 11

A. Jonsson: Fourier expansion as an aid in the solution of the diffusion equation for three-dimensional power distributions in water reactors 17

C. Wagemans and A. J. Deruytter: The Westcott g_f-factor for ^{239}Pu and its temperature dependence 25

P. Fortescue: The fusion breeder concept 29

B. K. Grimes: Reliability and performance of U.S. light-water cooled reactors 33

K. Debertin, U. Schötzig, K. F. Walz and H. M. Weiss: Gamma-ray emission probabilities of the fission products ^{144}Ce-^{144}Pr, ^{106}Rh, ^{95}Zr 37

Book Review 44

Current Papers in Nuclear Energy 45

NUMBERS 2–5

U. Farinelli: Introductory remarks on SMORN-1 49

N. Pacilio and V. M. Jorio: Progress in reactor noise analysis: SMORN-1 53

M. J. Bridge: NEACRP Specialist Meeting on Reactor Noise—from critical facilities to power plants. Rome—October 21–25 55

J. Mika: Two-particle correlations in reactor systems 59

F. Norelli, V. M. Jorio and N. Pacilio: Stochastic kinetics: analytical solutions of detailed probability balance equations 67

B. Arcipiani and M. Marseguerra: Probability profiles and moments of neutron count distribution via the Kolmogorov equations 77

J.-P. Genoud: A stochastic study of coupled reactor systems 85

N. Pacilio and V. M. Jorio: Discrete probability distributions in nuclear reactor noise . 89

M. Deiss: Some results about reactor neutron fluctuation analysis 95

J. T. Mihalczo and V. K. Paré: Theory of correlation measurement in time and frequency domains with ^{252}Cf 97

B. Bärs: Reactor gamma noise studies 107

Y. Gotoh: Study of the power spectral density by a nonlinear response to the stochastic input 119

F. Mathieu, R. Meier, M. Soenen, M. Delcon and C. Nysten: Thermoelectrically generated noise in sheathed thermocouples and in other low level instrumentation cables . . . 127

W. Matthes: Regression filter for signal resolution 141

J. Da Costa Oliveira, C. Morais Da Veiga, D. Forjaz Trigueiros and J. Pombo Duarte: Data acquisition and processing system for reactor noise analysis 149

J. T. Mihalczo: Time domain measurements for fast metal assemblies with ^{252}Cf . . . 161

J. T. Mihalczo, V. K. Paré and M. V. Mathis: Spectral density measurements with a mock-up of the fast flux test facility reactor 177

R. Isnard: Heat transfer coefficient and some other reactor parameters determined from measurements of fuel temperature and neutron flux fluctuations 193

J. C. Carre and J. Da Costa Oliveira: Measurements of kinetic parameters by noise techniques on the MINERVE reactor 197

M. Edelmann, J. Ehrhardt and W. Väth: Investigations of the two-detector covariance method for the measurement of coupled reactor kinetics parameters 207

E. Türkcan and J. B. Dragt: Studies of neutronic coupling by reactor noise analysis in the time domain for facilities of RCN, Petten 217

D. N. Fry: Temperature noise measurements in blocked and unblocked 19-pin electrically heated LMFBR fuel subassembly mockups 233

D. N. Fry, T. W. Kerlin and W. H. Sides: Dynamic heat transfer experiments in an electrically heated LMFBR fuel element mockup 235

P.-A. Haldy and M. Chikouche: Neutron generation time of the reactor "CROCUS" by an interval distribution method for counts collected by two detectors 237

L. G. Kemeny: The impact of twenty years of noise research on nuclear power plant design, instrumentation and control 241

K. Saito: Fundamentals of theoretical analysis of power reactor noise and their applications 251

J. A. Thie: Theoretical considerations and their application to experimental data in the determination of reactor internals' motion from stochastic signals 253

M. Edelmann: Some considerations on neutron instrumentation requirements for malfunction diagnosis in power reactors using noise analysis techniques 261

M. Matthey: A stochastic study of noise in boiling reactors 271

W. Bastl and V. Bauernfeind: The estimation of vibration of reactor internals by noise analysis of non-nuclear parameters 277

K. J. Serdula: Canadian experience in the area of reactor noise 287

R. A. Lewis, E. F. Bennett, S. G. Carpenter, C. E. Cohn and C. C. Price: Survey of recent applications of reactor noise techniques at Argonne National Laboratory 301

G. Kosály, L. Maróti and L. Meskó: A simple space dependent theory of the neutron noise in a boiling water reactor 315

P. E. Blomberg and F. Åkerhielm: A contribution to the experience of noise measurements and analysis in a BWR power plant 323

D. Pallagi, S. Horányi and T. Hargitai: Power reactor noise measurements in Hungary . 333

B. V. Kebadze and L. A. Adamovski: Non-linearity consideration when analyzing reactor noise statistical characteristics 337

D. N. Fry, R. C. Kryter and J. C. Robinson: Analysis of neutron-density oscillations resulting from core barrel motion in a PWR nuclear power plant 341

D. Wach: The analysis of at-power neutron flux noise in the frequency range of vibrating reactor structures 353

H. Nishihara: Boiling anomaly detection by acoustic noise measurement 365

S. A. Wright, R. W. Albrecht and M. F. Edelmann: Cross correlation of neutronic and acoustic noise signals from local boiling 367

T. Nomura: BWR noise spectra and application of noise analysis to FBR 379

M. H. Butterfield and J. D. Cummins: Plant disturbance and model verification . . . 391

K. Behringer, J. Phildius and W. Seifritz: An on-line subcritical reactivity meter based on a novel reactor noise analysis technique in the time domain 399

C. P. Greef: Measurements of temperature fluctuations in a gas-cooled power reactor . 405

H. Kataoka: Relation between nonlinear or "not-linear" characteristics in nuclear kinetics and noise analysis of neutron flux 407

H. Bunschi and W. Seifritz: A fast response thermocouple for temperature fluctuation measurements in sodium coolants 415

K. Behringer, D. Feuermann, Lj. Kostic and W. Seifritz: Correlation analysis of the environmental influences on the radioactive argon releases from the plume of the reactor DIORIT 419

W. Väth: Investigations of the influence of feedback and coupling effects on neutron noise in a nuclear reactor 427

Announcement—European Nuclear Society 437

NUMBER 6

R. L. Murray: Guest Editorial—Energy, Economics, and Education 441

S. M. Fadilah and J. Lewins: Optimal control rod programs in power reactors . . 443

R. H. Clarke, H. F. Macdonald, J. Fitzpatrick and A. J. H. Goddard: Waste disposal aspects of the long term cooling characteristics of irradiated nuclear fuels . . . 451

G. B. Bishop and I. Birchall: The nitrogen-16 radiation shielding unit at the Universities Research Reactor Centre 467

G. Kosály and J. Valkó: Remarks on the use of well-known reactivity measuring techniques by the pulsed-source method 477

F. C. Difilippo: Neutron wave propagation in multiplying assemblies with and without control rods 483

H. Murata: Foundations of a long-term strategy for nuclear power development in Japan . 495

R. J. Peterson, C. S. Zaidins, M. J. Fritts, N. A. Roughton and C. J. Hansen: Radioactive products from boron CTR reactions 503

Book Reviews 507

Announcement 515

Current Papers in Nuclear Energy 517

NUMBERS 7/8

H. Rief and J. Hartman: The effectivity of hydrogeneous moderators in pulsed neutron sources 521

C. Wagemans and A. J. Deruytter: The Westcott g_f-factor as a function of the temperature for ^{241}Pu 541

G. A. Hughes, S. K. Loyalka and W. Meyer: Analysis of a PWR vessel rupture using computer programs RELAP-3 and RELAP-4 545

A. Kocić: Direct and adjoint Monte Carlo sampling with reference to a resonance integral problem in a small phase element 555

K. Yamamoto: A Report on the Fifth International Conference on Plasma Physics and Controlled Nuclear Fusion Research, November 1974, Tokyo 565

J. Shaw: A Review of the I.A.E.A. Symposium on the Siting of Nuclear Facilities . . 579

Book Reviews 589

Current Papers in Nuclear Energy 595

NUMBERS 9/10

D. Okrent: A survey of expert opinion on low probability earthquakes 601

T. Hsieh, D. Okrent and G. E. Apostolakis: On the average probability distribution of peak ground acceleration in the U.S. continent due to strong earthquakes . . . 615

H. F. Macdonald: Practical limitations of criteria for limiting radiation risks to the public . 625

D. M. Gilliam and G. F. Knoll: An absolute determination of the ^{235}U fission cross section at 964 keV 637

J. S. Miller and N. D. Eckhoff: A linear programming fuel management model for the HTGR 649

M. D. Nordyke: A review of Soviet data on the peaceful uses of nuclear explosions . . 657

Symposium Announcement 687

NUMBERS 11/12

PROCEEDINGS OF THE WINGSPREAD CONFERENCE ON ADVANCED CONVERTERS AND NEAR BREEDERS

May 14–16, 1975

Editorial Note I

Preface by the Organizing Chairman III

List of Participants V

Session I: Nuclear Strategies, R. D. Thorne, Chairman

J. S. Foster and E. Critoph: The status of the Canadian nuclear program and possible future strategies 689

J. J. Taylor: The status of LMFBR development 705

J. R. Dietrich: Consideration of importance to decisions on an alternate nuclear program . 725

M. Levenson: How do 'converters' affect the strategy 737

E. L. Zebroski: Summary of advance converter strategy in the U.S. 741

Session II: Fuel Considerations, R. Dickeman, Chairman

R. Dickeman: Energy self-sufficiency: fuel cycle bottlenecks 745

M. Searl and J. Platt: Views on uranium and thorium resources 751

H. A. Bethe: Fuel for LWR, breeder and near-breeders 763

Session III: Technological Options, J. S. Foster, Chairman

L. W. Woodhead and L. J. Ingolsfrud: Performance of Canadian commerical nuclear units and heavy water plants 767

W. B. Lewis: Attainable ratings of CANDU–OC–thorium set by the properties of organic liquid coolant 779

P. Fortescue: Advanced HTGR systems 787

Session IV: Technological Options, A. M. Weinberg, Chairman

M. C. Edlund: High conversation radio plutonium recycle in pressurized water reactors . 801

A. M. Perry: Molten-salt converter reactors 809

W. M. Pardue: An evaluation of alternative nuclear strategies 819

W. M. Pardue: Addendum 835

Session V: Summary, A. M. Weinberg, Chairman

Concluding comments 841

AUTHOR INDEX

Adamovski, L. A. p. 337

NOTES FOR CONTRIBUTORS

I—GENERAL

1. Papers from authors in the United States should be submitted to the American Editor—Dr. J. P. HOWE. Papers from authors in other countries should be submitted to the United Kingdom Editor—Prof. M. M. R. WILLIAMS. All papers should be concerned with original work in the field of nuclear energy as described in the Editorial appearing in the *Journal of Nuclear Energy*, Volume 27, No. 12, 1973. Progress reports and reviews which satisfy the Editors' standards of scientific worth and topicality will be accepted for publication.

2. Reprints can be supplied at a reasonable cost provided they are ordered on the reprint order form when the page proofs are returned.

II—SCRIPT REQUIREMENTS

1. Scripts should be typewritten on one side of the paper only, and double-spaced. Submission of three copies of the manuscript will expedite review. It will be appreciated if authors will make clear any Greek characters, or vectors which may be confused with ordinary letters or with other characters. **Authors are requested to state, on the first page of the manuscript (a) number of manuscript folios (b) number of figures, and (c) number of Tables. The name and full mailing address of the author to whom proofs are to be despatched should be given on the title page of the manuscript. The publisher should be notified of any subsequent change of address.** Authors will receive page proofs of their article for correction, together with proofs of any figures which the paper may contain. It is requested that authors check their proofs very carefully and return the corrected set with the minimum of delay to the publisher. **Any substantial alterations, other than printer's errors, may be charged to the author.**

2. Original illustrations, and Tables suitable for direct reproduction, plus photocopies or other reproductions should accompany the manuscript separately, **and legends should also be typed on a separate sheet.** It is requested that photographs should be kept to the minimum necessary. Line drawings that require to be re-drawn should include all relevant details. If these are already well drawn it may be possible to reproduce them direct from the original, but in this case it is essential that the original drawings or good photo-prints should be provided. Any lettering on diagrams—other than Greek letters, symbols etc.—should be stencilled and should be sufficiently large and bold to permit reproduction when the diagram has been reduced to a size suitable for appearance in the journal. It is not possible to reproduce from 'dye-line' prints, or from prints with weak lines. Illustrations for reproduction should normally be about twice the final size required.

3. References to published literature should be quoted in the text as follows: Smith (1950)—the date of publication, in parentheses, following the author's name. References should be listed together at the end of each paper and not given as footnotes. They should be arranged in alphabetical order (first author's surname) to appear as follows:

Fermi E. and Marshall L. (1947) *Phys. Rev.* **72**, 1139.

Warner R. K. (1954) *Chem. Engng Sci.* **3**, 77.

It is particularly requested that (*a*) author's initials and (*b*) the volume or part numbers and page numbers are given in every case. Abbreviations of periodicals should be in accordance with the 4th edition of the *World List of Scientific Periodicals*.

4. The text of articles submitted should be concise and in a readily understandable style. The technical description of the methods used should only be given in detail when such methods are new. The preferred language is English, although papers in French and German will also be accepted. The essential contents of each paper should be briefly recapitulated in an abstract. French and German papers should be submitted with English abstracts and titles.

5. To conserve space, authors are requested to mark appropriate portions of the paper (such as description of methods, record of experimental results, etc.) for printing in smaller type.

Some Pergamon journals, text and reference books of possible interest to readers of this journal

ASPECTS OF ENERGY CONVERSION

Proceedings of the UK Science Research Council Summer School, held at Lincoln College, Oxford,

Editors: I.M. BLAIR, Energy Technology Support Unit, AERE Harwell, England, B.D. JONES & A.J. VAN HORN, Rutherford Laboratory, Didcot, England

These Proceedings present a course of selected lectures contributed by a distinguished panel of leading international experts. The Course was aimed principally at post-graduate students and those in the energy field who need to broaden their knowledge of this important subject. Because of the importance and topical nature of these papers they are being published within four months of the Summer School.

CONTENTS:

ENERGY RESOURCE FUNDAMENTALS

"The Energy Problem and the Earth's Fuel Situation"
Prof. G. R. Bainbridge, Newcastle upon Tyne University
"Economics of Resource Use"
Dr. D. L. Munby, Nuffield College, Oxford
"Principles of Energy Analysis"
Dr. P. F. Chapman, Open University, Milton Keynes

PATTERNS OF ENERGY CONSUMPTION

"Energy Demand in the United Kingdom"
Dr. R. Eden, University of Cambridge
"Energy Use in Industry"
G. E. H. Newton, Reed International
"Domestic Energy Use and Energy Conservation in Buildings"
S. J. Leach, Building Research Station, Garston, Watford
"Energy Consumption and Conservation in the U.S."
Prof. J. Rothberg, University of Washington, Seattle, WA, U.S.A.

ENERGY CONVERSION – FOSSIL FUELS

"Energy and the Coal Industry"
J. S. Harrison, National Coal Board, Stoke Orchard, Cheltenham
"Energy and the Oil Industry"
Prof. P. J. Garner, University of Birmingham
"Energy and the Gas Industry"
Dr. J. Gray, British Gas Corp, London
"The Sulphate Problem and Pollution Tax"
Prof. R. Wilson, Harvard University, Cambridge, MA, U.S.A.

ENERGY CONVERSION – NUCLEAR FUELS

"Fission Reactors"
Prof. D. C. Leslie, Queen Mary College, London
"Breeder Reactors"
Dr. W. P. Dale, U.K. Atomic Energy Authority, Risley
"Fusion Technologies"
Dr. K. Roberts, UKAEA, Culham Laboratory, Culham
"The U.S. Nuclear Reactor Controversy"
Prof. R. Wilson, Harvard University, Cambridge, MA, U.S.A.

ENERGY CONVERSION – ALTERNATIVES

"Geothermal Power"
Dr. E. J. Oxburgh, University of Oxford
"The Atmosphere and the Oceans as Energy Sources"
Dr. D. Swift-Hook, CEGB Marchwood Engineering Laboratory
"Solar Energy"
Dr. B. J. Brinkworth, University College, Cardiff

ENERGY TRANSMISSION AND STORAGE

"Electricity Generation in CEGB"
Dr. J. K. Wright, Central Electricity Generating Board
"Electricity Transmission and Storage"
Dr. W. T. Norris, Central Electricity Research Laboratories
"Other methods of Transmission and Storage"
Dr. T. E. Smith, Cranfield Institute of Technology
"The Hydrogen Economy"
Dr. J. K. Dawson, Energy Technology Support Unit, AERE Harwell

POSSIBLE DEVELOPMENTS IN ENERGY USE

"Transportation"
Dr. S. S. Wilson, University of Oxford
"Industrial Processes"
M. Hadlow, Electrical Research Association, Leatherhead
"Total Energy Systems"
C. M. D. Peters, Total Energy Co., Ltd. Oxford

ENVIRONMENTAL, SAFETY, ECONOMIC AND SOCIAL ASPECTS

"Environmental Aspects of Resource Extraction and Energy Conversion"
Dr. C. Ducret, United Nations, Geneva, Switzerland
"Radioactive Waste Disposal, Reactor Safety and Siting"
E. C. Williams, Chief Nuclear Inspector, Thames House South, London
"Energy and Social Economics"
Prof. M. Gaskin, University of Aberdeen
"Sociological Consequences of Energy Developments"
Prof. F. M. Martin, University of Glasgow

ENERGY SYSTEMS STUDIES

"Methodology of Energy Analysis"
Dr. P. F. Chapman, Open University, Milton Keynes
"The use of Energy Analysis in Modelling/Forecasting"
Dr. P. Roberts, SARU, Dept. of Environment, London
"Analysis of Selected Energy Systems"
Prof. F. Roberts, ETSU, Dept. of Energy, AERE Harwell

ASSESSMENT AND FUTURE DIRECTIONS

"General Assessment of Energy Technologies"
Prof. B. T. Feld, MIT, Cambridge, MA, U.S.A.
"The Importance of Energy Research and Energy Policy"
Lord Balogh, Dept. of Energy, Thames House South, London
"Summary Lecture"
Dr. I. M. Blair, ETSU, Dept. of Energy, AERE Harwell

SPECIALISED SEMINARS

"Thermodynamics and Energy"
Prof. N. Kurti, University of Oxford
"Energy Use in Agriculture"
Dr. D. J. White, Ministry of Agriculture, Food, & Fisheries
"Energy from Wastes"
W. Sabel, Oxford Polytechnic
"The Autonomous House"
Dr. J. G. F. Littler, University of Cambridge
"Energy Technologies for Less Developed Countries"
Prof. P. Dunn, University of Reading

PANEL DISCUSSIONS

"Relative Merits and Future Prospects of Fossil Fuels"

"Prospects for Nuclear Power"

"Relative Merits of Transmission and Storage Methods"

"The Social and Environmental Limits to Energy Growth"

"The Implications of Energy Analysis"

OF INTEREST TO: Postgraduate students, scientists, researchers and practising engineers; energy agencies, government and industrial bodies.

ISBN 0 08 019975 5 f 840pp 250 x 176mm 400 illus

ENGINEERING & MATERIALS SCIENCE

IRANIAN JOURNAL OF SCIENCE AND TECHNOLOGY

An International Research Journal now published by Pergamon Press

Editor-in-Chief: M. SHAHINPOOR, Department of Mechanical Engineering, Pahlavi University, Shiraz, Iran

AIMS AND SCOPE: Provides an international medium for the publication of original papers on all aspects of science and technology and is designed to serve as a forum for the exchange of technical knowledge, ideas, and the results of important research amongst scientists and engineers throughout the world.

Readers are kept informed on recent developments in their field through inclusion in the Journal of Short Communications, Technical Notes, authoritative Review Articles and Book Reviews. Communication between readers, authors and editors is promoted through discussion of published papers and Letters to the Editor.

A Selection of Forthcoming Papers and Contributors

J.L. DINELEY & S.E. MIKHAIL, Synchronous Generator Dynamic and Transient Stability — The Effects of Generator and System Parameters
University of Newcastle-upon-Tyne, England

V.M. RADHAKRISHNAN, Strain Intensity Factor and Low Cycle Fatigue
Universitat Karlsruhe, West Germany

N. TABANDEH, Mathematical Justification of the Finite Element Method
University of Tehran, Iran

G. SCHAFFER, Mechanical Forces due to Short Circuit Currents
Pahlavi University, Iran

S.K. GHOSH, Circular Ring Problem in the Theory of Asymmetric Elasticity
Indian Institute of Technology, India

F. HABER & M.R. NOORCHASHM, Some New Results in Negatively Correlated Branches in Frequency Diversity Systems
University of Pennsylvania, USA

J.J. GOLECKI, Mean-Stress Approach in Two-Dimensional Elasticity (Normal Regions)
Technion-Israel Institute of Technology, Israel

M. FARSHAD, A Self-Adjointness Study of a Class of Elastromechanic Problems in Bars
Pahlavi University, Iran

I.J. GOOD, The Number of Hypotheses of Independence for a Random Vector or for a Multi-Dimensional Contingency Table, and the Bell Numbers
Virginia State University, USA

H.M. REJALI, Distribution of Transverse Moments on Concrete Bridge Decks
Tehran Polytechnic, Iran

Published Quarterly

Energy Conversion

An International Journal

Editor-in-Chief: JESSE C. DENTON, University of Pennsylvania, Philadelphia

A Selection of Forthcoming Papers:

H. G. LORSCH, K. W. KAUFFMAN and J. C. DENTON, Thermal Energy Storage for Solar Heating and Off-peak Air Conditioning
National Centre for Energy Management and Power, University of Pennsylvania, Philadelphia, Pennsylvania, USA

C. D. HAWLEY and M. MITCHNER, Electron Vibrational Energy Transfer Under MHD Combustion Generator Conditions
Department of Mechanical Engineering, Stanford University, Stanford, California, USA

W. PUDLIK, Thermodynamic Analysis of a Coal Fired MHD Power Cycle with Chemical Heat Regeneration
Technical University of Gdansk, Poland

L. RIEKERT, The Conversion of Energy in Chemical Reactions
Institut fur Chemische Verfahrenstechnik, Universitat Karlsruhe, Karlsruhe, Germany

J. E. KLEPEIS and J. F. LOUIS, The Disk MHD Generator Applied to Open Cycle Power Generation
Avco Everett Research Laboratory, Inc., Everett, Massachusetts, USA

A. BENNETT, Monitoring Thermoelectric Properties of Noninstrumented RTGs
McDonnell Douglas Astronautics Company, Washington, USA

J. R. WILHELMI, The MHD Induction Converter Compensated by Superposition
Ciudad Universitaria, Madrid, Spain

Published Quarterly

Solar Energy

The Journal of Solar Energy Science and Technology

Editor-in-Chief: PETER E. GLASER, Arthur D. Little Inc., Acorn Park, Cambridge, Massachusetts 02140, USA

SOLAR ENERGY, the official Journal of the International Solar Energy Society, is devoted exclusively to the science and technology of solar energy applications.

Some Recent Papers from SOLAR ENERGY:

W. D. K. CLARK and J. A. ECKERT, Photogalvanic Cells
Exxon Research & Engineering Company, New Jersey, USA

C. B. EATON and H. A. BLUM, The Use of Moderate Vacuum Environments as a Means of Increasing the Collection Efficiencies and Operating Temperatures of Flat-plate Solar Collectors
Southern Methodist University, Dallas, Texas, USA

S. CATALANOTTI *et al.*, The Radiative Cooling of Selective Surfaces
Istituto di Fisica Sperimentale dell'Universita di Napoli, Napoli, Italy

M. KOVARIK, Optimal Solar Energy Collector System
Commonwealth Scientific and Industrial Research Organization, Victoria, Australia

N. FISCHILLO, Semi-transparent Solar Collector Window Systems
Rutgers University, New Jersey, USA

H. P. GARG, Year Round Performance Studies on a Built-in-storage Type Solar Water Heater at Jodhpur, India
Central Arid Zone Research Institute, Jodhpur, India

Published Bi-monthly

PROGRESS IN NUCLEAR ENERGY

The international annual review series on all aspects of nuclear energy

Editorial Advisory Group:

J.V. Dunworth	Teddington
Sir Montague Finniston	London
J. Gueron (Executive Editor)	Paris
J. Howe (Executive Editor)	La Jolla
A.M. Weinberg	Oakridge
M.M.R. Williams (Executive Editor)	London

The editorial control of the Proceedings is the responsibility of the Editorial Board consisting of:

J. Gueron & M. Mantega	French language
R. Sher & M.M.R. Williams	English language
Pierre Zaleski	Editor in chief

Organizations who are current subscribers to the "Progress in Nuclear Energy" series will receive the proceedings of this conference as part of their 1975 subscription.

Volumes for 1975 consist of the Official Proceedings of the European Nuclear Conference, Paris, April 1975; some 4000 pages of the most recent reports on Nuclear Energy.

The
PERGAMON INTERNATIONAL LIBRARY
of Science, Technology, Engineering & Social Studies

The 1000 volume original paperback library in aid of education, industrial training and the enjoyment of leisure.

- low priced student textbooks in all academic subjects
- low priced textbooks for craft and vocational courses
- low priced textbooks for industrial and commercial training
- specially commissioned in a carefully planned series for each subject
- written by authors in many countries to the highest possible academic standards for an international readership
- each book individually designed
- attractively and speedily produced by the most modern printing and binding techniques
- promoted and distributed internationally
- widely translated into other languages including German, Spanish, Italian, Japanese, etc.
- all books available for free inspection by teachers and lecturers wishing to consider them for course adoption

Please write to the Publisher at the most convenient address below for a complete catalogue or descriptive subject catalogues in your field of interest.

PERGAMON PRESS

Headington Hill Hall Oxford OX3 0BW England
Fairview Park Elmsford New York 10523 USA

THE PERGAMON TEXTBOOK INSPECTION COPY SERVICE

An inspection copy of any Pergamon International Library book suitable for use as a course text for undergraduate or graduate students will gladly be sent for consideration for adoption without obligation. Copies may be retained for a period of 60 days from receipt and returned if not suitable. When a particular title is adopted or recommended for adoption for class use and the recommendation results in a sale of 12 or more copies, the inspection copy may be retained with our compliments. If after examination the Lecturer decides that the book is not suitable for adoption but would like to retain it for his personal library, then our Educators' Discount of 10% is allowed on the invoiced price.

Essential Reference Works

MULTILINGUAL DICTIONARIES in Science and Technology

___ ALFORD. Russian-English Scientific and Technical Dictionary, 2 volume set

___ ANGELE. Four Language Dictionary of Chromatography (English/German/French/Russian)

___ BINDMANN. Dictionary of Semiconductor Physics and Electronics (English/German: German/English)

___ BURGER. Technical Dictionary of Data Processing, Computers and Office Machines (English/German/French/Russian)

___ CROWE. A Concise Dictionary of Soviet Terminology, Institutions and Abbreviations

___ DAWYDOFF & HOWORKA. Technical Dictionary of High Polymers (English/German/French/Russian)

___ FRENOT & HOLLOWAY. Agard Aeronautical Multilingual Dictionary (English/French/German/Dutch/Italian/Russian/Spanish/Turkish) Supplement

___ KONARSKI. Russian/English Dictionary of Modern Terms in Aeronautics and Rocketry Russian/English Space Technology Dictionary. Both Volumes as a set

___ KORNER. Dictionary of Textile Finishing (English/French/German/Russian)

___ LINDEKE. Technical Dictionary of Heating Ventilation and Sanitary Engineering (English/German/French/Russian)

___ MORITZ & TOROK. Technical Dictionary of Spectroscopy & Spectral Analysis (English/German/French/Russian/with a supplement in Spanish)

___ MULLER. Technical Dictionary of Automotive Engineering (English/German/French/Russian)

___ NEIDHARDT. Dictionary of Electronics (English/German/French/Russian)

___ NEUBERT. Technical Dictionary of Hydraulics and Pneumatics (English/German/French/Russian)

___ PAENSON. Systematic Glossary of Selected Economic and Social Terms (English/French/Spanish/Russian)

___ SANTHOLZER. Five Language Dictionary of Surface Coatings, Plating, Products Finishing, Corrosion, Plastics and Rubber (English/American/Czech/Russian/German/French)

___ SOBECKA. Dictionary of Chemistry and Chemical Technology in 4 languages (English/German/Polish/Russian)

___ SOBECKA. Dictionary of Chemistry and Chemical Technology in 6 languages (English/German/Polish/Russian/French/Spanish)

___ SUBE. Dictionary of Nuclear Physics and Technology (English/French/German/Russian)

___ THEWLIS. Encyclopaedic Dictionary of Physics Multilingual Glossary (English/French/German/Spanish/Russian/Japanese)

___ TROSKOLANSKI. Vocabulary of Mechanics Volume 2 - Mechanics of Fluids (English/German/French/Polish)

___ USSOVSKY. Comprehensive Russian/English Agricultural Dictionary

___ WALTHER. Dictionary of Mechanics, Strength of Materials and Materials (English/German:German/English)

___ Polytechnical Dictionary Volume 1 (English/German)

___ Polytechnical Dictionary Volume 2 (German/English)

___ Technical Dictionary of Production Engineering (English/German)

___ Technical Dictionary of Production Engineering (German/English)

___ ZBOINSKI & TYSZYNSKI. Dictionary of Architecture and Building Trade (English/German/Polish/Russian)
